

EFI™ JETRION® UV INK JET DIGITAL PRINTING IS REALLY TAKING OFF

The convenience and flexibility of digital printing has increased the popularity of the technology. EFI Jetrion brand UV ink jet presses can print on many of our standard pressure sensitive products without requiring a special top coating, making material sourcing easy. Their system is ideal for short runs, offering quick set-up with minimal waste and no plate production. EFI Jetrion 4000/4830 UV ink jet inks provide durable printed images and color consistency from run-to-run, including realistic skin tones. And with a variety of prime and variable paper and film options available Trimless, finding the construction you need is simple, including cover-ups and all temp, cold temp, and removable adhesives.

Digital printing is a growing trend. Can we help you? Call your sales rep to learn more.
