## Technical Data - Diversiprint

# Technical Data for Printing DiversiPrint® Pressure Sensitive for Production Toner Presses, Laser Printers, and Copiers

### Paper Products

#### Laser printing after offset printing:

- For best laser processing results, after offset printing immediately package printed stock in a moisture barrier wrap

#### Desktop and mid-range laser printers:

- Feed through manual feed tray
- Use "heavy paper" setting or set to proper GSM for best toner anchorage

#### High-speed laser printers:

- For best feeding results, use the belt/friction feed loading tray and the top delivery tray
- Use the appropriate GSM setting for best toner anchorage and feeding

### Film Products

- For best toner anchorage, use appropriate GSM or thickness setting. In some printers, "heavyweight" is the correct setting
- When printing clear, choose the "white" setting as the printer will recognize the liner
- Use the maximum amount of static elimination
- If a jam occurs, turn the sheets so that the opposite edge becomes the feed edge as the jam may have been caused by a bent corner

## Full Sheet Digital Express Program ►

In need of sizes not stocked in the standard digital line?  
Are standard sizes not working for the best label layout or optimum press efficiency?  
Does your customer require a standard size but prefers bulk packaging due to the quantity involved?

## Let us help you with our Full Sheet Digital Express Program

When non-stocking digital sheet sizes are needed for maximum press efficiency, use the Full Sheet Digital Express Program.

**Products:** all stock constructions listed in this Digital Catalog qualify

- Papers & Films for Toner or HP Indigo printing
- Permanent, Removable (Ultra-Removable for films) and Cover-ups
- HP Indigo certified substrates
- Toner products successfully tested in several leading printers, including but not limited to: KODAK NEXPRESS, Xerox DocuColor and iGen Series, Canon and Konica Minolta

**Sizes:** 8 ½ x 11, 8 ½ x 14, 11 x 17, 12 x 18, 13 x 19 and 14 x 20 sheet sizes\*

**Packaging:** bulk packed in cartons

**Order/Freight:** Minimum: 1,000 sheets/ Maximum: 10,000 sheets\*

**Leadtime:** ships in 2 - 5 business days

\* Larger quantities and additional digital sizes are available but may have a longer leadtime

## Technical Support ►

Questioning which construction works in your digital equipment?  
Not sure which product is recommended for the application?  
Need additional printing tips for a specific printer?

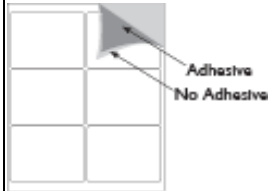

Spinnaker's **Technical Consulting** Group is ready to answer your questions..... call 877-210-5104 for assistance.

## Die Cut Laser Label Tips and Guidelines

### Label Formatting

Follow printer software guidelines for formatting label data. See Spinnaker's website at [www.spinps.com](http://www.spinps.com) for label templates. Labels are also compatible with Avery Label Pro and other popular software. For cross reference, select the layout code that corresponds with the Spinnaker label. If no label is found, use the Spinnaker measurements to create a new label.

### Fanning

Select the desired number of label sheets and gently fan the edges to reduce static electricity. If curl is evident, manually bend and flatten the sheets before loading.

### Loading and Printing

Consult the owner's manual to determine the proper placement of labels in the feed tray. It is acceptable to place the labels directly on top of the paper that may be in the tray. Do not exceed the recommended number of sheets. For best toner anchorage and processing, ensure printer settings reflect proper weight. Proceed to make copies as if printing paper. Reference GSM for printer settings.

### Caring for unused labels

Place any unused sheets from the paper tray into the protective plastic bag and store in a cool, dry environment.

### Cautions

Do not run label stock through the printer twice. Should a jam appear, locate the jammed sheet and remove it before restarting the printer. Products made with Advantedge Technology<sup>®</sup> adhesive are not recommended for guillotine applications.
